

NEW HIGH POWERED ELTEX ION BLOWER PISTOLS FOR 'EX' ZONED FINISHING AND MIXING AREAS

Arrowquint say that Eltex have recently introduced a special 'Ex' version of their high-powered PR55 ion blower pistol for use in 'Ex' zoned areas such as paint booths, mixing areas and laboratories where uncontrolled static charges can ruin finishes and cause fires.

The EXPR55 is operator-friendly with a light weight, non-slip handle and comes with a trigger air control and hanging loop for safe storage when not in use. It can be used with air or nitrogen and operates at a powerful 6 bar pressure.

The new EXPR55 pistol is approved to Ex 112G EEx m ib IIA T5 and connects to the compact Eltex ES53 power supply, which can operate up to 5 separate pistols (subject to cable length restrictions).

Full technical information on the EXPR55 and ES53 power unit can be obtained from Eltex's exclusive Agents Arrowquint Ltd by visiting their website at www.arrowquint.co.uk or by calling their head office near Cheltenham on TEL: 01242 604555.
